

As one of several million truck drivers delivering goods across this country, I need and enjoy satallite radio. Having access to traffic and weather conditions for major cities before I am in range of local stations allows me to plan my route and rest breaks. I pay for satallite radio and personally am sick and tired of those that are afraid of competition and try to stifle new technology and service. I ask that the FCC reject the NAB's petition 04-160 and allow XM to continue to provide the service and programming I demand and deserve.
